WORK EXPERIENCE

Fullstack Software Engineer

Survey Exchange platform from Netherland | Dec 2021 - Present

— Reduced CI/CD process duration by 50%.

— Isolated the error-prone core function by refactoring into small, and testable chunks yet easy for modification.

— Research and integrate alternative/free tools that saving operation cost without breaking the current code interface.

— Maintain and responsible for all other technical aspects: customer success, API designing/versioning, architecturing, upgrading, intergation testing, CI/CD.

Software engineer

Influencer marketing platform from Sweden | Feb 2020 - Dec 2020

— Reduced test suite elapsed time from 7 to 3 minutes

— Improved front-end development experience livereload from 10s to 3s

— Developed database-heavy functions such as searching, data migration

Ruby on Rails Developer

Event agency from Malaysia | Aug 2018 - Jan 2020

— Automated processing 10k+ orders and post-payment procedure by integrating payment gateway and 3rd-parties.

— Identified the bottle neck enhance API response from 9s to around 3-4s

Carried out stress testing, detected potential problems when the application was at its peak.
